

ANA

AI Receptionist

Your Smart College Front Desk Assistant

BCA 8th Semester Project · Kantipur City College · 2026

Created by: Ankit Chandra Karn · Srijan Basnet · Suraj Panthi

Introduction

ANA is an intelligent virtual assistant for Kantipur City College that answers college-related questions in a natural conversational manner.

Objectives

AI receptionist, document-based answering, voice interaction, avatar response, local deployment, maintainability.

The Problem

College enquiries are repetitive, generic chatbots lack context, and voice/avatar systems are computationally heavy.

The Solution

A local assistant grounded in real college documents using RAG, with text, voice, and avatar modes.

How It Works

User → Intent → FAISS → LLM → Audio + Avatar

ANA - Making college reception smarter, faster, and more human.
